

ALEKSANDR HUBANOV

FULL-STACK DEVELOPER

+380 63 771 51 16 | eeri.dev@gmail.com | linkedin.com/in/aleksandr-hubanov | eeri.dev | Romania

Full-stack developer experienced in building maintainable web applications and REST APIs with Python, Django/FastAPI, PostgreSQL, React, and TypeScript. Strong focus on backend architecture, authentication, API integration, reusable frontend systems, and Docker-based environments.

EXPERIENCE

IVE STUDIO - Full-Stack Developer

Feb 2025 - Apr 2026

Product development studio focused on web platforms and digital products

Remote

- Designed and delivered REST APIs with Python, Django, and PostgreSQL, supporting reliable data exchange across web platform workflows.
- Implemented authentication and role-based access control, centralizing permission enforcement for platform users.
- Built React and TypeScript interfaces connected to backend services, with reusable components and a scalable frontend structure.
- Standardized the development environment with Docker and Docker Compose, improving consistency across local and deployment workflows.

AI-DEF - Full-Stack Developer

Apr 2023 - Dec 2024

Defense technology company developing autonomous systems and UAV platforms

Remote

- Developed Django backend services and APIs for internal platforms supporting data management and operational workflows.
- Modeled, queried, and maintained application data in PostgreSQL through the Django ORM.
- Integrated frontend interfaces with backend APIs, enabling web-based access to internal tools and platform workflows.
- Containerized development and deployment environments with Docker to improve reproducibility across the delivery process.

TECHNICAL SKILLS

Languages: Python, TypeScript, HTML, CSS

Backend: Django, FastAPI, REST APIs, authentication, role-based access control

Frontend: React, reusable component architecture, API integration

Data & Infrastructure: PostgreSQL, Django ORM, Docker, Docker Compose
